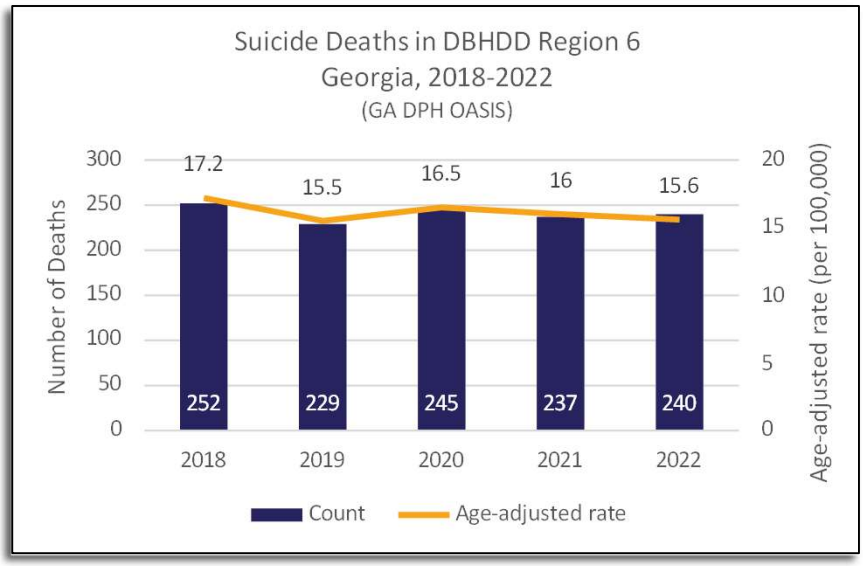
Suicide in Region 6

Counties: Butts, Carroll, Chattahoochee, Clay, Coweta, Crawford, Crisp, Dooly, Fayette, Harris, Heard, Henry, Houston, Lamar, Macon, Marion, Meriwether, Muscogee, Peach, Pike, Quitman, Randolph, Schley, Spalding, Stewart, Sumter, Talbot, Taylor, Troup, Upson, Webster

240 deaths

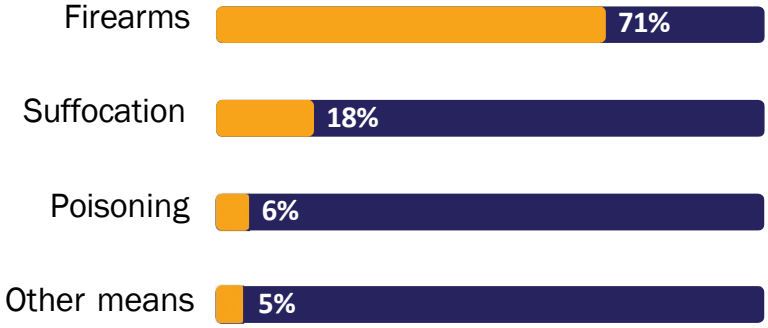
Region 6 had 240 suicide deaths in 2022, which equates to 6,861 years of potential life lost. Compared to other regions, Region 6 had the highest suicide death rate among people 65 years and older. There were no suicide deaths among Indigenous people or Pacific Islanders. There were also no suicide deaths in those 0-9 years old.

Georgia Dept of Public Health



MEANS OF DEATH

Firearms are the most common means of suicide death followed by suffocation, drug poisoning, and other means. Males and females utilize suffocation and other means at similar frequencies, though more females use drug poisoning while more males use firearms (Georgia Violent Death Reporting System, 2021).



DEMOGRAPHICS

AGE

Suicide death rates are highest among people ages 25-44 years old.

SEX

Males account for almost 78% of deaths while females account for approximately 23%.

RACE

Suicide deaths are most common among white people followed by Black or African American people, those who are multi-racial, and Asian people.

ETHNICITY

Suicide deaths are more common among people who aren't Hispanic.

SUICIDE ATTEMPTS

1,414 medically treated attempts in 2022

Emergency department visits and hospital discharges are used to measure the number of medically treated suicide attempts. Emergency department visits indicate a less severe consequence due to the attempt while hospitalizations indicate severe consequences that require extensive medical treatment. This estimate does not consider suicide attempts that were not medically treated. It is estimated that for every suicide death, there are 25 attempts (National Center for Health Statistics, 2020).

Medically treated attempts have *decreased* since 2018.

1,022 emergency room visits
Rate of 71.5 people per 100,000 persons

Emergency room visits have *decreased* since 2018.

392 hospital discharges
Rate of 26.3 people per 100,000 persons

Hospital discharges have *decreased* since 2018.
