Suicide in Region 3

Counties: Clayton, DeKalb, Fulton, Gwinnett, Newton, Rockdale

415 deaths

Region 3 had 415 reported suicide deaths in 2023. This equates to 13,595 years of potential life lost. Compared to other regions, Region 3 had the lowest overall suicide death rate. Region 3 had the lowest death rate among white people and the lowest reportable suicide rate among those 10-17 years of age. In other age groups, Region 3 had the highest death rate among those aged 18-24 years, and the lowest death rate among those 25-44 and 45-64 years of age. There were no suicide deaths reported among Pacific Islanders.

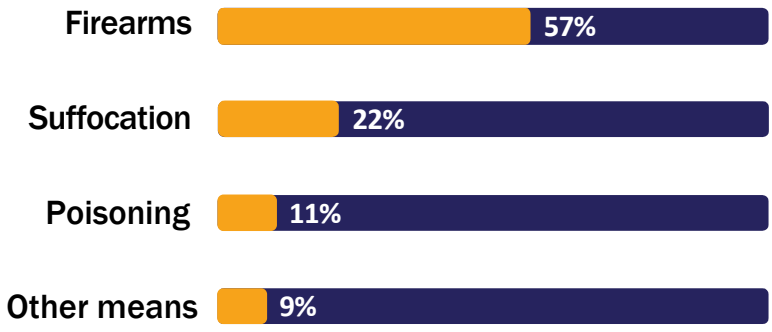
MEANS OF DEATH

Firearms are the most common means of suicide death followed by suffocation, drug poisoning, and other means. Males and females utilize suffocation and other means at similar frequencies, though more females use drug poisoning while more males use firearms (Georgia Violent Death Reporting System, 2022).



Notes: Data limited to deaths that occurred in the state of Georgia. Weapon types are not mutually exclusive; more than one weapon type can be involved in one incident

DEMOGRAPHICS

AGE

Suicide death rates are highest among people ages 18 - 24 years old.

SEX

Males account for 81% of deaths while females account for 19%.

RACE

Suicide deaths are most common among white people followed by black or African American people and Asian people.

ETHNICITY

Suicide deaths are more common among people who are not Hispanic.

SUICIDE ATTEMPTS

2,500 medically treated attempts in 2023

Emergency department visit and hospital discharge data is used to measure medically treated suicide attempts. Emergency department visits indicate a less severe consequence due to the attempt while hospitalizations indicate severe consequences that require extensive medical treatment. This estimate does not consider suicide attempts that were not medically treated. It is estimated that for every suicide death, there are 25 attempts (National Center for Health Statistics, 2020). Data source: GA DPH OASIS

Medically treated attempts have *decreased* since 2019.

1,712 emergency room visits
Rate of 51.7 people per 100,000 persons

Emergency room visits have *decreased* since 2019.

788 hospital discharges
Rate of 23.1 people per 100,000 persons

Hospital discharges have *decreased slightly* since 2019.
